RATIOTEC

WE SUPPORT RETAIL

“The secret of success is
to get the other person’s point of view.”

Henry Ford

In Essen, in the heart of the Ruhr area, we have dedicated ourselves since 2003 to developing customized cash-handling solutions.

Whether a single or multiple retailer, bank or casino: with us you can find the best products for what you need – „Design and Engineering in Germany“.

Our philosophy: high quality, functional design, sustainable service and expert advice.

This is also appreciated by our long-term, national and international customers.

Your ratiotec Team

HISTORY & DEVELOPMENT

RATIOTEC UPDATE MANAGER READY FOR THE NEW EURO

Install once, use continuously – a single software for all updates.

New Euro notes for Europe

The European Central Bank (ECB) started to introduce the second Euro banknote series (EUR2) in 2013. All banknotes are equipped with improved security features. Following the introduction of the new 50 Euro note in April 2017, the new 100 and 200 Euro notes will be brought into circulation shortly.

What does that mean for my device?

An update is required so that your banknote detectors and banknote counters can recognise the new banknotes.

With ratiotec you will still be on the safe side!

We have developed our own software in order to keep your device always up to date – the ratiotec Update Manager. After you have installed the software on your PC, it will inform you automatically as soon as a new update for your device is available. This applies not only to the new banknotes of the EUR2 series, but also to security or currency updates.

The Update Manager guides you step by step through the update process in just a few minutes.

Where can I find the Update Manager?

The Update Manager is available for download on our website for free: www.ratio-tec.com

This is how it works:

1. Install the software once on your Windows PC.
2. The Update Manager informs you automatically as soon as a new update for your device is available.
3. Open the software, connect the device, start the update and it's done!

Did you buy your ratiotec device before 1st of January 2014?

In this case, you do not have the license number required for the Update Manager and the update cable to connect the device to the PC. However, this is not a problem! Order a license number and an update cable for your device from us. You will be able to use both of them in the future for further updates.

Alternatively, you can purchase the appropriate update kit directly. This consists of a license number, update cable and the update software on a USB stick.

Another function of our Update Manager – Money scale for the desired currency

With Update Manager you can quickly and easily install your desired currency combination in your ratiotec money scale. A currency combination always consists of a total of 3 currencies. On purchasing, by default your scale counts EUR, GBP and CHF. The currency selection is easily performed by "drag and drop". A license number is not required!

COUNTERFEIT DETECTION EXPLANATION & FEATURES

In addition to our manual and automatic detectors, the majority of our banknote counters also subject banknotes to counterfeit detection. To make counterfeiting difficult, real banknotes are equipped with various security features. By testing these features, suspicious banknotes can be detected.

You can see here which abbreviation stands for which feature of counterfeit detection, as you will encounter these again and again in this catalogue:

Similar to the image

	Symbol	Feature	Counterfeit detection
1.	WL	White light	Visualisation of the watermark of a banknote
2.	UV	Ultra violet	Visualisation of UV colour (UV lamp) of a banknote. Reflection of UV light (banknote counters) of a banknote
3.	IR	Infrared	Visualisation/identification of the infrared reflection pattern of a banknote
4.	MG	Magnetism	Identification of the magnetic features of a banknote
5.	MT	Magnetic thread	Identification of the security thread of a banknote
6.	SD	Format	Recognition of the length, width and thickness of a banknote
7.	CIS	Contact Image Sensor	Full image recognition of the banknote (scanner) at a resolution of at least 30 dpi

PICTOGRAMS LEGENDS

BANKNOTE DETECTORS

OVERVIEW

Manual & automatic banknote detectors

The counterfeiting industry has become more and more professional over the past few years. Counterfeits are hardly recognisable as such at first sight. Protect yourself from accepting counterfeit money – with the help of Ratiotec banknote detectors. You have the choice between a simple, manual check i.e. you examine

the banknote yourself for certain features, or you can choose for an automatic detector from our Soldi Smart series. These deliver a 100% reliable, clear result in less than a second.

BANKNOTE DETECTORS

RP 50 – Banknote detector pen

The ideal solution if you:

- want to check banknotes discreetly and unobtrusively
- want a quick and easy check of a feature

Overview:

- For all currencies, except polymeric (plastic coated) banknotes
- Counterfeit detection: Chemical composition
- Simply mark the banknote with the detector pen
- Light discoloration = real banknote
Dark discoloration = suspicious banknote
- The indicator colour disappears on real banknotes after only a few seconds

real banknote

suspicious banknote

Soldi 120 – manual detector for UV features

The ideal solution if you:

- want to check manually banknotes, travel documents, or official documents with UV features on them

Overview:

- For all currencies
- Counterfeit detection: UV
- Application: Banknotes | Travel documents | Official documents with UV features
- The UV lamp makes fluorescence features visible

Fluorescent features become visible with the help of the UV lamp (Soldi 120 & 185)

Soldi 185 – manual detector for UV, WL, MG and MT features

The ideal solution if you:

- also want to check manually other features in addition to the UV features

Overview:

- For all currencies
- Counterfeit detection: UV | WL | MG | MT
- Application: Banknotes | Travel documents | Official documents with UV features
- The UV lamp makes fluorescent features visible, the white light shows the watermark and the magnetic sensor checks for magnetic properties

The watermark becomes recognisable by the white light (Soldi 185 only)

SOLDI SMART BANKNOTE DETECTOR

We support retail

Soldi Smart – automatic banknote detector

The compact solution which is ideal for the POS – the Soldi Smart automatic banknote detector. The LED symbols and the acoustic warning signal deliver a clear result in less than a second. Suspicious banknotes are also ejected to the rear. No manual examination required, no additional functions, no training required!

100 % reliable counterfeit detection

The ideal solution if you:

- are looking for a compact solution for POS
- want very reliable, fast counterfeit detection at a low price
- do not need additional functions

Overview:

- Currency: EUR | others optional
- Counterfeit detection: IR | MG | MT | SD
- 100% reliable testing in less than a second
- Clear result via LED symbols and acoustic warning signal
- Suspicious banknotes are ejected to the rear.
- As there is only the on and off button and no user menu with additional functions, the device can not be accidentally reconfigured.
- Especially durable thanks to high quality and outstanding workmanship
- Can also be used mobile (rechargeable battery optional)
- Easy to open and easy to clean

real banknote

suspicious banknote

Easy to clean: Open up - free from dust and dirt - close it again - and it's done!

SOLDI SMART PLUS BANKNOTE DETECTOR

Soldi Smart Plus – Automatic banknote detector

Our banknote detector Soldi Smart Plus combines design, functionality and efficiency in a compact POS solution. The high quality LED display and the acoustic warning signal give you a clear result in less than a second.

The ideal solution if you:

- are looking for a compact solution for the POS
- want very reliable, fast counterfeit detection
- want to use additional functions in addition to the test, e.g. counting function, language setting, eco mode, etc.

Overview:

- Currency: EUR | GBP | CHF | others optional
- Counterfeit detection: IR | MG | MT | SD
- 100% reliable testing in less than a second
- Clear result by means of LED display and warning signal
- Configurable whether a suspicious banknote should be ejected or held at the rear or the front
- 5 language user menu
- Especially durable thanks to high quality and outstanding workmanship
- Can also be used mobile (rechargeable battery optional)
- Easy to open and easy to clean

- Can also be used mobile (rechargeable battery optional)
- Easy to open and easy to clean

real banknote

suspicious banknote

Easy to clean: Open up - free from dust and dirt - close it again - and it's done!

BANKNOTE COUNTERS

OVERVIEW

rapidcount compact, B- & S-series

The models of the rapidcount B- and S-series belong to the so-called "backloaders", i.e. the banknote feeder is located in the upper, rear area of the devices. A smaller quantity (about 100 banknotes) can be easily inserted here. Thanks to the addition function, you can always

refill new notes. These are calculated in the overall result. The side feeder of the compact model also magnificently handles small quantities and can – as well as the stacker – be folded after use.

BANKNOTE COUNTERS

OVERVIEW

rapidcount T- & X-series

The banknote counters of the rapidcount T- and X-series belong to the so-called "frontloaders". In contrast to the "backloaders", the banknote feeder is located in the front, upper area of the device. The notes can simply be placed here

as a whole stack. The adjustable rails assist in achieving optimum alignment. The counters can easily process even large stacks of notes due to the high feeder.

RAPIDCOUNT B 20 | B 40 | COMPACT BANKNOTE COUNTERS

rapidcount B 20 | B 40 – Piece counter

Our solid entry level models for small counting volumes. Both the B 20 and the B 40 reliably and quickly determine the quantity of your presorted notes.

The ideal solution if you:

- have presorted banknotes
- only want to determine the number of notes
- have a small counting volume (about 200,000 banknotes/year)
- are looking for a low priced entry level model

Overview:

- Piece counter
- Currencies: EUR | others optional
- Ideal for small counting volumes
- Counterfeit detection:
B20: UV | IR
B 40: UV | IR | MG | SD
- Batch function (counting stop according to specified number of notes)
- unbeatable value for money

rapidcount compact – Piece and value counters

The name speaks for itself – our compact banknote counter for the small business.

The ideal solution if you:

- in addition to the number of pieces also want to determine the value of the notes counted
- have a small counting volume (about 100,000 banknotes/year)
- want reliable counterfeit detection
- are looking for a space saving device, but still do not want to miss the functions of the "larger" ratiotec devices
- want to have the ability to count banknotes easily while on the go

Overview:

- Piece and value counter
- Currencies: EUR, GBP and CHF
- Ideal for small counting volumes
- Counterfeit detection: IR | MG | MT | SD
- Display of total amount and quantities per type of note
- Batch function (stop counting according to specified number of notes)
- Print function for a clear printout of the counting results
- Small and compact
- Also suitable for mobile use thanks to the optional rechargeable battery

After use simply fold the compact together and save even more space!

RAPIDCOUNT S 200 | 225 | 275

BANKNOTE COUNTERS

rapidcount S 200 – Piece counter

The classic one for small counting volumes in a new design. The Piece counter S 200 with combined counterfeit detection reliably counts presorted banknotes.

The ideal solution if you:

- have presorted banknotes
- only want to determine the number of notes
- have a small counting volume (about 400,000 banknotes/year)
- attach importance to a clear display and intuitive operation

Overview:

- Piece counter
- Currencies: EUR | others optional
- Ideal for small counting volumes
- Counterfeit detection: UV | MG
- High quality TFT colour display

The language selection is possible via the high quality TFT colour display.

rapidcount S 225 & S 275 – Piece and value counter

The two models S 225 and S 275 from the newly launched S series quickly determine not only the quantity but also the exact value of the banknotes.

The ideal solution if you:

- in addition to the number of pieces also want to determine the value of the notes counted
- have a small counting volume (about 400,000 banknotes/year)
- attach importance to a clear display and intuitive operation
- are looking for a low priced entry level model

Overview:

- Piece and value counter
- Currencies: EUR | others optional
- Ideal for small counting volumes
- Counterfeit detection:
S 225: UV | SD
S 275: UV | IR | MG | SD
- Display of total amount and quantities per type of note
- Batch function (stop counting according to specified number of notes)
- Print function for a clear printout of the counting results
- High quality TFT colour display

RAPIDCOUNT T 200 | 225 | 275

BANKNOTE COUNTERS

rapidcount T 200 – Piece counter

Magnificent and powerful – our rapidcount T 200 banknote counter. The piece counter with counterfeit detection reliably counts presorted banknotes.

The ideal solution if you:

- have presorted banknotes
- have a medium counting volume (about 800,000 banknotes/year)
- only want to determine the number of notes
- want reliable counterfeit detection

Overview:

- Piece counter
- Ideal for medium counting volumes
- Currencies: EUR | GBP | CHF | USD | SEK | CZK | RON
- Counterfeit detection: UV | IR | MG | MT | SD
- Batch function (counting stop according to specified number of notes)
- Counts even heavily worn and dirty banknotes without any problem
- Self-explanatory operating concept

The rapidcount T-series can handle even high banknote stacks without any problems.

rapidcount T 225 | T 275 – Piece and value counters

The T-series piece and value counters with a simple (T 225) and extensive counterfeit detection (T275) reliably count sorted and unsorted banknotes.

The ideal solution if you:

- in addition to the number of pieces also want to determine the value of the notes counted
- have a medium counting volume (about 800,000 banknotes/year)
- want reliable counterfeit detection (T 275)

Overview:

- Piece and value counter
- Ideal for medium counting volumes
- Currencies:
T 225: EUR | GBP | others optional
T 275: Value counting and testing: EUR | GBP | CHF (unsorted banknotes)
piece counter and detector: USD | SEK | CZK | RON | TRY | PLN | BGN (sorted banknotes)
- Counterfeit detection:
T 225: UV | SD
T 275: UV | IR | MG | MT | SD
- Display of total amount and quantities per type of note
- Batch function (counting stop according to specified number of notes)
- Print function for a clear printout of the counting results
- Counts even heavily worn and dirty banknotes without any problem
- Self-explanatory operating concept

RAPIDCOUNT X 400 BANKNOTE COUNTER

rapidcount X 400 – Piece and value counter

In addition to its elegant design and the high quality TFT colour display with touchscreen, the X 400 convinces with numerous functions and its 100% reliable counterfeit detection thanks to CIS full screen recognition.

The ideal solution if you:

- in addition to the number of pieces also want to determine the value of the notes counted
- have a high counting volume (about 1 million banknotes/year)
- want very reliable, extensive counterfeit detection
- attach importance to easy cleaning

Overview:

- Piece and value counter
- Ideal for high counting volumes
- Currencies: EUR | GBP | USD | CHF | PLN
- Counterfeit detection: UV | IR | MG | MT | SD | CIS
- Large feeder for high banknote stacks
- High quality TFT colour display with touch screen
- Display of total amount and quantities per type of note
- Batch function (stop counting according to specified number of notes)
- Print function for a clear printout of the counting results
- Serial numbers are recognised and can be printed if required
- Comfortable cleaning and easy removal of stuck and jammed banknotes thanks to the easy to open transport unit.

We support retail

Comfortable cleaning and easy removal of stuck and jammed banknotes thanks to the easy to open transport unit.

Currency selection via high quality TFT colour display with touchscreen surface.

Thanks to the large feeder it is ideal for counting high banknote stacks.

RAPIDCOUNT X 500 BANKNOTE COUNTER

rapidcount X 500 – Piece and value counter

The 1.5-pocket professional with 100% reliable counterfeit detection. Thanks to the additional reject compartment, the value and piece counter can process up to 1,200 banknotes per minute without interruptions.

The ideal solution if you:

- have a high counting volume (about 1,4 million banknotes/year)
- want very reliable, extensive counterfeit detection
- need to count even heavily worn and dirty banknotes
- want to count many unsorted banknotes at the same time

Overview:

- Piece and value counter
- Currency: EUR | GBP | USD | RON | CHF
- Counterfeit detection: UV | IR | MG | MT | SD | CIS
- Ideal for high counting volumes
- Simultaneous counting of different currencies possible
- Large feeder for high banknote stacks
- High quality TFT colour display with touch screen
- Suspicious, heavily soiled or damaged banknotes are sorted into the additional reject compartment without any interruption of the counting process
- Display of total amount and quantities per type of note
- Batch function (counting stop according to specified value or specified number of notes)
- Print function for a clear printout of the counting results
- Sorting of banknotes by type and orientation possible
- Serial numbers are recognised and can be printed if required
- Easy to open transport units allow the removal of stuck or jammed notes and the comfortable cleaning of the device

We support retail

Comfortable cleaning and easy removal of stuck and jammed banknotes thanks to easy to open transport units.

Currency selection via high quality TFT colour display with touchscreen surface. It is also possible to count mixed banknote of different currencies.

Suspicious, damaged or highly soiled banknotes are ejected to the reject compartment. This allows a smooth counting process.

MONEY SCALES

Money scales and till cups

Counting money by weighing – the entire cash accounting in under 2 minutes with our money scales. Easily count sorted coins and banknotes with just one device. Due to the enormous time savings in the area of cash accounting our

money scale pays for itself within the shortest time. With the help of coin containers (till cups), which are available for all common cash drawer models, the duration is further reduced.

ratiotec till cups – for even faster, more comfortable counting of coins

Save even more time with your cash accounting through the use of till cups! For each of our money scales, you can take up to eight differently sized till cups. We offer you a selection of till cups for different cash drawers from various manufacturers.

Our customer support team will be pleased to advise you and help you to find the right till cup for your cash drawer: Just call us at +49 (0) 201/361 49 - 0 (Monday to Friday from 8am to 5pm)!

RS 1000 | 1200 | 2000

MONEY SCALES

The coin cup included in the scope of delivery allows the counting of coins.

RS 1000 | 1200 – our basic models with static weighing function

Counting money can be this easy! With our affordable entry level models RS 1000 and 1200, you can easily count coins and banknotes. The self-explanatory menu guidance accompanies you automatically through the complete cash accounting.

The ideal solution if you:

- have sorted banknotes and sorted coins
- only want to use one device for the complete cash accounting
- want to save time and space

Euro coin tubes can also be counted without problems (RS 1200 only).

Overview:

- RS 1000: counts banknotes and coins
- RS 1200: counts banknotes, coins and coin rolls
- Currency: EUR | GBP | CHF | Other optional
Desired currency combinations can simply be put together via Update Manager by means of "Drag & Drop"
- Static weighing function (count EUR1 and EUR2 separately, meaning that banknotes must be sorted according to old and new EUR series)
- Reference weighing function (for prescriptions, vouchers and various sales slips)
- Available optionally: XL weighing hod (allows intermittent feeding and counting of up to 400 banknotes)
- Operation via battery or mains cable

Optionally available till cups allow even faster counting of coins.

RS 2000 – our all rounder with dynamic weighing function

Your cash accounting in less than 2 minutes. The RS 2000 is the ideal solution for your complete cash management. Using the principle of "dynamically learning" new weights, it can easily count mixed old and new Euro banknotes of one denomination.

The ideal solution if you:

- have sorted banknotes and sorted coins
- want to save time and space
- only want to use one device for the complete cash accounting
- count mixed old and new notes and do not want to make any additional updates

Overview:

- Counts banknotes, banknote bundles, coins and coin rolls
- Currency: EUR | GBP | CHF | Other optional
Desired currency combinations can simply be put together via Update Manager by means of "Drag & Drop"
- Dynamic weighing function (counting mixed EUR1 and EUR2)
- No update required
- XL weighing hod allows intermittent feeding and counting of up to 400 banknotes
- Reference weighing function (for prescriptions, vouchers and various sales slips)
- Operation via battery or mains cable

NEW: Optimised change function

To simplify your cash management further, we have optimised our change function. In the future, at the end of the counting process, you can use our "Info button" to view both the total of your count as well as the amount of money that can be withdrawn from your cash account in coins or notes to maintain your desired (individually adjustable) change reserve.

The coin cup included in the scope of delivery allows the counting of coins.

Euro coin rolls can also be counted without problems.

Optionally available till cups allow even faster counting of coins.

- Dimensions (L x W x H in mm): 415 x 425 x 130
- Weight (in kg): 10.5

COIN COUNTERS AND SORTERS

OVERVIEW

All coin counters

The manual counting of coins is extremely laborious, costs valuable time and can not be accomplished beyond a certain amount. Make more meaningful use of your time and leave the work to our coin counters! We offer the right device for different coin volumes. The same

principle applies to all: Simply pour the coins into the feeder and receive a detailed result at the end of the count. Our coin counters from the CS-series not only count your coins, they also sort them.

Technical data	CS 50	CS 250*
Counts coins sorts coins	✓ ✓	✓ ✓
Currency	EUR	EUR
Display	LED display	LED display
Speed	200 coins per minute	550 coins per minute
Operational performance	200,000 hours per year	400,000 hours per year
Capacity of feeder	250-400 coins	500-600 coins
Display of total amount amounts	✓ ✓	✓ ✓
Batch function (adjustable quantity stops)	✓	✓
Connections	Mains plug	Mains plug Printer
Optional accessories	Tubular output set Coin wrappers	Receipt printer
Dimensions (L x W x H in mm)	335 x 350 x 270	330 x 330 x 255
Weight (in kg)	5.0	4.8

*** Also available in the variant "CS 250 special"**
In contrast to the standard model, the CS 250 special has only 5 coin containers (10 cents | 20 cents | 50 cents | 1 Euro | 2 Euro) and is therefore suitable for companies that do not accept 1, 2 or 5 cent pieces, e.g. for casinos or gaming salons.

COIN COUNTERS AND SORTERS

coinsorter **CS 50** – Coin counter and sorter

Our magnificent entry level model CS 50 for smaller counting volumes counts your Euro coins fast and reliably.

The ideal solution if you:

- want to count and sort mixed coins
- have a small coin volume (about 200,000 coins/year)
- want to be able to fill coins in coin tubes comfortably (see optional accessories)

Overview:

- Counts and sorts Euro coins
- Display of total amount and quantities per type of coin
- Batch function allows the storing of counting stops per type
- The optionally available tubular output set enables the wrapping of the coins

The optionally available tubular output set allows you to wrap the coins in a simple and fast way.

coinsorter **CS 250** – Coin counter and sorter

Minimum wear and reliable counting results – the robust CS 250 for medium counting volumes.

The ideal solution if you:

- want to count and sort mixed coins
- have a small coin volume (about 400,000 coins/year)
- Attach importance to easy cleaning and maintenance

Overview:

- Counts and sorts Euro coins
- Display of total amount and quantities per coin type at a glance
- Batch function allows the storing of counting stops per type
- Print function for a clear printout of the counting results
- Minimum wear due to robust metal plate inside the device
- Removable coin feeder allows the removal of foreign matter from the coin feeder and easy cleaning of the machine
- Foam inserts in the coin cups reduce the noise volume during the counting process

Thanks to the easy to open transport unit, foreign objects can be removed from the coin feeder and the internal sensors can be cleaned.
